THE PANDA HERITAGE

40 years ago, the first FIAT Panda was born, and since then it acquired great popularity. Since 2012 it is the **most sold city-car in Italy**, becoming an important part of the Italians' lives.

From the very beginning it had a very **distinct personality**: the exteriors communicated **robustness** and **solidity**, while the interiors perfectly merged **style** and **functionality**.

In these 40 years Panda went through **3 different generations** and many special **versions** to fulfill the needs of about 8 million customers.

Grande Panda will incarnate the values of its predecessors, evolving into a **B-segment** model: suitable for the everyday city movements, but also capable for longer trips and adventures.

The registration fee and total vehicle price indicated in the price list are estimates calculated on the basis of the vehicle's standard specification without optional equipment, vehicle mass and the applicable motor vehicle taxation legislation in force at the time of publication. The final CO₂ emission value and the corresponding tax amount are determined individually for each vehicle in accordance with its specific configuration, production date and the CO₂ value stated in the relevant Certificate of Conformity (CoC). The final tax amount and total vehicle price may therefore differ from the estimated amount indicated in the price list.

Fuel and electricity consumption, electric driving range and CO₂ emission values are determined in accordance with the WLTP test procedure under standardized laboratory conditions in compliance with applicable European Union legislation. Such values are established for each individual vehicle based on its production configuration and equipment level. Actual consumption, emissions and driving range may vary depending on, inter alia, driving behavior, vehicle load, road and traffic conditions, terrain, ambient temperature, battery condition and optional equipment.

The manufacturer and/or importer reserves the right to amend technical specifications, equipment, model structure and prices at any time without prior notice. The information contained in the price list does not constitute a binding offer.
